## From the CEO

It may be summer holidays but the activity level at Quantum is high. This week our new Board Chairman, Steven Pleging visited Vancouver to meet with board members, our scientists, key stakeholders and myself to discuss the next phase in Quantum's strategic plan. Much was discussed. The tactical elements of our plan; major fundraising, a German presence, strategic partnerships and our technology rollout are being executed as I write.

The newly announced private placement offering has started with a bang and is well underway with over half a million dollars raised in the first few days. The [Frankfurt Stock Exchange](#) listing process is proceeding very quickly with a scheduled listing date of October 15, 2011. A new office in Germany has been selected and is located at REGUS at Speditionsstrasse. Steven is currently in Dusseldorf to view the facilities from which we will work to establish Quantum as a compelling addition to the solar energy landscape in Germany. While in Germany, Steven is introducing Quantum to potential strategic partners and others who can contribute to the success of our ambitious goals. Andras and his team are continuing to make great strides in the lab. Additional deposition tools and other scientific instrumentation have been ordered which will further accelerate our time to market.

Thanks for your continued support.

Daryl Ehrmantraut  
CEO/President

# Quorum Capital Corporation Hired

Quantum is pleased to enter into an agreement with Quorum Capital Corporation. Quorum will provide assistance in establishing our new Dusseldorf office and will assist Quantum in hiring staff for that office, ensuring all German employment and business requirements are met.

Wolf Weise, the CEO of Quorum has an extensive background in assisting other companies enter the German market. A native German, Mr. Weise maintains extensive contacts throughout Germany and will be a key aid in Quantum's effort to establish a presence there.

## Quantum Issues New Foreign Private Placement

Last week Quantum's board of directors approved the issuance of a new foreign private placement in the amount of \$3.0 million USD. The private placement offering is up to 3,000,000 shares of Quantum's common stock at a price of \$1.00 per share. The offering will be made to Non-United States persons who are accredited investors as defined in Regulation S of the Securities Act of 1933 (the "Act").

Quantum intends to use the net proceeds from this financing to further develop its solar technology and for working capital purposes. There is no assurance that the Foreign Private Placement will be completed on the above terms or at all.

*The above does not constitute an offer to sell or a solicitation of an offer to buy any of the Quantum's securities in the United States. The securities have not been registered under the United States Securities Act of 1933 and may not be offered or sold within the United States or to U.S. persons unless an exemption from such registration is available.*
